

About Brecca Theme for Concrete CMS

Brecca is an excellent choice for creators who want a clean, minimalist theme that lets content stand out against a compelling visual backdrop—perfect for events, portfolios, and personal websites where first impressions matter.

Initially inspired as an electronic invitation theme—especially for weddings—Brecca pairs elegance with simplicity for virtually any event or occasion.

Brecca is beautifully suited to one-page websites, but it also scales to full multi-page experiences. It was designed to shine with full-screen background imagery and overlays, creating a striking visual presentation while keeping content clear and focused. Through the Concrete CMS editing interface, site owners can customize the theme quickly and confidently, making it ideal for smaller, focused websites.

Key Features

Elegant Typography: Your site name is displayed as an H1, with eleven custom Google font options.

Page Layouts: Provides a centered full-page layout with configurable color styling in the theme panel.

Styled Core Blocks: Includes tailored styling for Image Slider and Social Links blocks.

Preset System: Eleven presets offer quick visual starting points, primarily focused on typography and site-name styling.

Content Structure: Supports a full-width main content area, optional two-column sections, and a bottom global area for social icons or additional content.

Smart Front-End Enhancements: JavaScript helps avoid typographic widows and scales the site name to reduce awkward line breaks on smaller screens.

Additional Highlights

Centered Social Links Template: Easily align social icons in the center of the page.

Background Image Support: Includes a background image block for straightforward per-page background management.
